

11. (New) A method for making a lithographic printing plate from an original containing continuous tones comprising the steps of:

screening said original using a frequency modulation screening to obtain screened data; and

scan-wise exposing a lithographic printing plate precursor according to said screened data, said lithographic printing plate precursor having on a support a surface capable of being differentiated in ink accepting and ink repellant areas upon said scan-wise exposure.

12. (New) A method according to claim 11, further including the step of:

developing the scan-wise exposed lithographic printing plate precursor.

Respectfully submitted,
